Keywords:

CFS; Cobalt; Vitamin D3

1. Abstract

In this paper, we delve into the cause of CFS. It is undiagnosed in 90% of cases. It can be so debilitating that the patient can't work which leads to a host of other health problems. It seems that Cobalt found with iron and in Vitamin B12 is the problem. A person can be allergic to Cobalt. The antidote to a cobalt allergy is Vitamin D3.

2. Introduction

Chronic Fatigue is the most common complaint that Physicians hear. And it is most common among the aged. In this paper, we try to quantify the illness by considering some chemistry and AT Math.

$$\text{Fe/Ca} = \text{Vit C/Vit D}$$

$$\text{vit C} = \text{C}_6\text{H}_8\text{O}_6 = 176.12$$

$$55.845/40.078 = 176.12 / \text{vit D}$$

$$\text{vit D} = 126.3 = \rho = M/\text{vol} = 4/\pi = 1/t = E$$

$$\text{Vit C} = 1/\sqrt{2} = v = a = \sin(\pi/4) = F$$

So,

$$E = \text{vit D}$$

$$t = \text{Ca} \cdot \text{vit C}$$

$$\text{Fe Vit D} = \text{ca Vit C}$$

$$\text{Fe} \cdot E = t$$

$$\text{Fe} \cdot 1/t = t$$

$$\text{Fe} = t^2$$

$$55.845 = t^2$$

$$\text{Fe-ca Vit D-1} = E = \text{vit D}$$

$$\text{Fe-Ca vit D-1} = \text{vit D}$$

$$\text{Fe-1} = \text{vit D-ca vit D}$$

$$\text{Fe-1} = \text{Vit (1-Ca)}$$

$$90\% = \text{Vit D}(38\%)$$

$$\text{Vit D} = \text{Vit D deficiency/ Vit c Deficiency}$$

$$E = \hbar v$$

$$\text{Ca Vit C} = 6.626v$$

$$v = 106.7 = t$$

$$\text{Ca} = 40.078 \times 6.022 = 6.6423 \approx \hbar$$

$$\text{Fe(OH)}_3 = 106.78$$

$$E = \hbar v = 6,626t = 6,626(40.078) = 2.66 = \text{SF}$$

$$\text{Treated Water Ca} = 55.8 \text{ mg/L} = \text{Fe} = 55.845$$

$$\text{Fe/Ca} = 1 \text{ mg/L} / 1 \cdot x$$

$$x = 179.06 = 1/E$$

$$1/t = E x = 1/\pi = \text{freq of human mind} = v$$

$$\pi^2 - \pi - 1 = 57.29^\circ = 1 \text{ rad}$$

$$E = \hbar v$$

$$1 = 6/626v$$

$$v = 150.9$$

$$1.5^2 - 1.5 - 1 = -0.25 \text{ Catalyst on GMP}$$

$$57.29^\circ/360^\circ + (1) + 57.29/360$$

$$= 2(2591) + 1 = 2fd - 1 = 0$$

$$2Fd - 1 = E$$

$$2t^2 = 1/t$$

$$2t^3 - 1 = 1$$

$$t = \sqrt[3]{2} = 126.0 \approx \rho = 4/\pi = 1/t = E$$

$$E = \text{vit D}$$

NaOH ⇒ Low blood Pressure =F/A

freq of human mind =1/π=1/t=E

1/F/A=E

1=F ·E

E=1/F=1/sin 45°=1/(1/√2)

E=√2=sin 45°+cos 45°

Two pole solution y=y'

KE=PE

NaOH=Ca=Fe

Fe/Ca=NaOH

55.845/40.078=2.135~2.14 =Calcium Limit in distributed water.

FeCl₃ + 3 H₂O = Fe(OH)₃ + 3 HCl

3NaCl + H₂O = 3NaOH + 3HCl

8 C₆₃H₈₈CoN₁₄O₁₄P + 164 H₂O + 134 NO₂ →

8 H₃PO₄ + 84 C₆H₁₂O₆ + 123 N₂ + 8 CoO

Vit B12 → Phosphate + Sugar

Mass of reactants=12.022

NaOH Mass= 40.000

12.022/40=3.00= Allowable limit of Fe

16 C₆₃H₈₈CoN₁₄O₁₄P + 236 NO₂ →

115 C₈H₁₀N₄O₂ + 16 H₃PO₄ + 105 H₂O₂ + 16 CoO + 88 CO₂

16 mol of Vit B12 x (1355.37)+236(46.01)=196=1/5.1020=1/Me-

115 mol of Caffeine x (194.19) x 6.022=134.5/96gm of caffeine per cup of coffee=14.007=N

N₁₄=14 x 14=196=1/Me-

14 x 5 cups per day=7.00=1/Economic Multiplier

3 NaOH + H₃PO₄ = Na₃PO₄ + 3 H₂O

CaCl₂ + Na₂HPO₄ = CaHPO₄ + 2 NaCl

3NaCl + H₂O = 3NaOH + 3HCl

Salt leads to high blood pressure, kidney failure, and fatigue.

Maria, Stephen and Paul all drink a lot of coffee. They all have low blood pressure NaOH.

FeCl₂ + Co = CoCl₂ + Fe

Cobalt is found where Iron Chloride is found. It is the Cobalt; not the Iron that causes schizophrenia. Stephen's father was a Schiotz. Maria and Paul's grandfather and father was a Scholz.

Fe(OH)₃ + 3 NaCl = FeCl₃ + 3 NaOH

106.87+3(58.44)=16.993=OH → Cancer, Depression, Fatigue

C₆₃H₈₈CoN₁₄O₁₄P + 53 OH + 32 NO₂ → H₃PO₄ + 46 NH₃ + CoO + 63 CO₂

So the OH uses up the Vitamin B12 which is necessary for iron to carry oxygen to the cells. The result is chronic fatigue.

24 C₆₃H₈₈CoN₁₄O₁₄P + 902 Fe(OH)₃ + 738 CCl₄ →

Vitamin B12 Sz Kidneys

1125 C₂O₂H₄ + 902 FeCl₃ + 246 HCl + 24 H₃PO₄ + 336 NO₂ + 24 CoO

HGH Sz

CCl₄ + 2 CoO = CO₂ + 2 CoCl₂

(1)(153.82)+(2(74.93) 303.68 x 6.022=1828

t=e^M=e^{0.1828}=12.006 → Carbon

-F-1=E

E²-E-1=0 GMP

In the Ice Houses from the early 20th Century, they used to get ice from a lake, in this case Lilly Lake. Then horses would haul the blocks of ice to the Ice House, in this case Doland's Ice House on Seaton Street in East Saint John. The unenviable job of washing the ice (H₂O) with ammonia to remove horse dirt was done by the young boys (My father and Uncle Bill) .The Cusack family had an Inn and horse stable next to Doland Ice.

The horses used in the ice-cutting process were fitted with special spiked shoes to keep them from slipping. And when horses did what horses invariably do, there were boys with the job title of "shine boy" who were given the enviable task of cleaning up after the horses, and rinsing the ice with ammonia to remove any traces of the inevitable. NH₃ + H₂O → NH₄ + OH

4 C₅H₅N₅ + 25 O₂ → 20 CO₂ + 10 HOH + 10 N₂

Adenine

6 OH + 2 NH₃ → 6 H₂O + N₂

5 C₂O₂H₄ + 6 NO₂ → 6 NH₃ + 10 CO₂ + 2 OH

HGH

4 C₅H₅N₅ + 25 O₂ → 20 CO₂ + 10 HOH + 10 N₂

Adenine

2HOH → H₂+2OH

C₅H₅N₅+2H₂ → C₅H₉N₃ +N₂

Adenine → Histamine (Allergy) to cobalt

NH₄+2H₂O → NO₂ +4H₂

2NO₂ → N₂+O₂

2O₂+Co → 2CoO

3. Conclusion

It seems that the amount of energy a person has is directly related to the vitamin D in their system. People of color living in low sunlight climates should suffer from "laziness" more commonly than Caucasians.

The treatment for CFS is vitamin D supplements and Vitamin C as well as water that doesn't have too much iron or calcium. In addition, if the patient is not allergic to cobalt, take vitamin B12
