1. Abstract
In this paper, we delve into the cause of CFS. It is undiagnosed in 90% of cases. It can be so deliberating that the patient can’t work which leads to a host of other health problems. It seems that Cobalt found with iron and in Vitamin B12 is the problem. A person can be allergic to Cobalt. The antidote to a cobalt allergy is Vitamin D3.

2. Introduction
Chronic Fatigue is the most common complaint that Physicians hear. And it is most common among the aged. In this paper, we try to quantify the illness by considering some chemistry and AT Math.

Salt leads to high blood pressure, kidney failure, and fatigue.

Maria, Stephen and Paul all drink a lot of coffee. They all have low blood pressure NaOH.

FeCl₂ + Co = CoCl₂ + Fe

Cobalt is found where Iron Chloride is found. It is the Cobalt; not the Iron that causes schizophrenia. Stephen’s father was a Schiotz. Maria and Paul’s grandfather and father was a Scholz.

In the Ice Houses from the early 20th Century, they used to get ice from a lake, in this case Lilly Lake. Then horses would haul the block of ice to the Ice House, in this case Doland’s Ice House on Seaton Street in East Saint John. The inevitable job of washing the ice (H₂O) with ammonia to remove horse dirt was done by the young boys (My father and Uncle Bill). The Cusack family had an Inn and horse stable next to Doland Ice.

The horses used in the ice-cutting process were fitted with special spiked shoes to keep them from slipping. And when horses did what horses invariably do, there were boys with the job title of “shine boy” who were given the enviable task of cleaning up after the horses, and rinsing the ice with ammonia to remove any traces of the inevitable. 3. Conclusion

It seems that the amount of energy a person has is directly related to the vitamin D in their system. People of color living in low sunlight climates should suffer from “laziness” more commonly than Caucasians.

Volume 7 | Issue 14
The treatment for CFS is vitamin D supplements and Vitamin C as well as water that doesn’t have too much iron or calcium. In addition, if the patience is not allergic to cobalt, take vitamin B12.
